

IN THE FAMILY

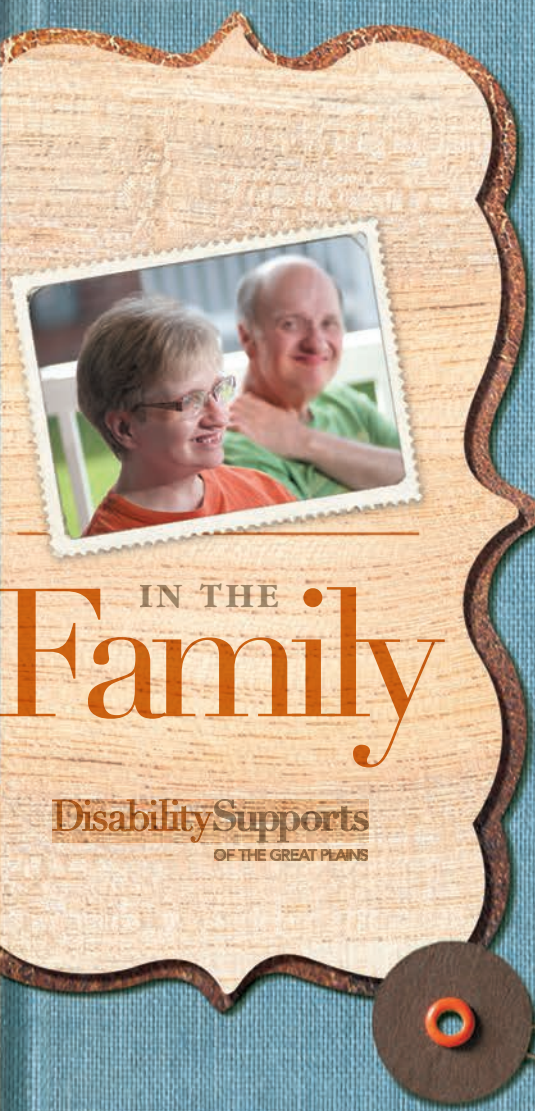

WELCOME TO A HIGHER

Standard of Care

If you have a child or family member with unique intellectual or physical disabilities, helping them develop a rewarding life as an adult may seem like too much to hope for outside of your existing family structure. Disability Supports, in McPherson and Hutchinson, Kansas, restores this hope by offering a higher standard of care.

- We provide a wide array of life-enriching opportunities
- We set the standard for residential and day services
- We create entrepreneurial opportunities
- We create rewarding educational experiences
- We deliver comprehensive case management services
- We support social, emotional and physical wellness
- We design, build and manage modern, specifically adapted, high-quality housing

*Frequent group
excursions provide
a change of
scenery for all.*

We Value Family Beyond these valuable services is a gift much more profound — it is the gift of family. Clients aren't the only ones who "join a family." Parents and other relatives are invited to become and remain involved. It's a family that never stops growing.

We Deliver Excellence Disability Supports is different — when others say, "That's good enough," we say, "Disability Supports will do it better." Our facilities are beautiful, warm and inviting. Our staff members form deep bonds of care and friendship with those we serve. The quality of our programs and services is unsurpassed.

We Offer Opportunity Disability Supports exists to enrich the lives of each and every member of our community and the communities we share. Here, clients become artists, engage in social media, go to concerts, exercise, make new friends, and volunteer to enrich their communities.

Supportive Home Care Our staff members serve those who are caring for loved ones at home through specific programs for children and adults, and through professional, trusted case management services.

Physical Supports Many of those served by Disability Supports have unique and profound disabilities. Our training and initiatives are continually and proactively assessed for the assurance that we are always elevating the standard of care.

Residential Supports Many of our clients live within specially designed and built neighborhoods offering a balance of independence and oversight. The two-bedroom, duplex-style homes are specifically designed for the unique abilities of those we serve, to assure a safe, comfortable and enjoyable living environment.

Wellness Supports Members of our community are in need of person-to-person, day-to-day healthcare. Our services are tailored to the individual and include overall wellness monitoring, medication administration, contracted nursing and coordination of medical care with specialists and experts.

Activities and Events We believe having fun is a key contributor to the physical and emotional wellness of those we serve.

"The success of Disability Supports is most attributable to the fact that we take pride and seek perfection in everything we do. Our innate desire to enrich the lives of both our clients and our staff drives us to exceed all expectations."

— Rick Staab, President, CEO
